M. Thiers' Great Speech. No other subject is touched upon by the journals of the French capital than the stand-up fight between Louis Philippe's old Minister and the present Minister of State. The speech of Mr. Thiers was most brilliant though perhaps a little too lengthy. It was much like the majority of this gentle. man's Parliamentary orations, it did not arrive at any practical conclusion. It was a speech and nothing more. It was a speech and nothing more. It is composed of two parts, the first North-West Territory at an early being a large page of history-a little date." too cold perhaps-like the frost which rises in the memory of men to certify either to the wisdom or the shortsightedness of the present; but the second-a master-piece of public discussion - rapid, luminous, glowing with the fire which patriotism would render generous even though it should go astray. M. Thiers' argument is this: Events have followed their course, and what is the situation at this day? Prussia, aggrandized, now counts 30,000,000 of subjects—even 40,000,000 with the Confederations of | how the relations between France and Prusthe South. That power is young and sia stood. The great diplomat said :- " We ambitious, and here arises the first attach great value to our friendly relations danger for Europe. But there is another peril not less great and urgent: that of some attempt being made in the East analagous to what has been accomplished in Germany; the danger of Constantinople- "the Empire of the Herr von Benigsen proper for a deputy, but world," as Napoleon called it at Tilsitfalling into the hands of the Russians. But there is still more. These two tion on the pretended negotiations which perils for Europe are closely connected, for if between St Petersburg and land for the cession of the Duchy, I can de-Berlin there is no treaty yet signed, there is at least an evident community tween those States. In a very proper and becoming spirit the opposition of New Brunswich, through their organ, the St. John federation, and their determination to says:

"The anti-confederates of this prono disposition to do anything but to of the measure as far as it can possi-b'y be done. We believe we speak the sentiments of the anti-confederate party, when we say that they are willing to give this new system of Government a full and fair trial."

It is highly creditable, says the Toronto Globe, to the opposition to take this ground. It is the only ground consistent with tone patriots although they ought not to be of the new system of government.

Red River Settlement.

It is said that the following menumber of members of both the House of Lords and House of Commons:

"This settlement, situate in the centre of British North America, contains a population of about 12,000 British subjects, principally engaged in agricultural pursuits. It is the seat of bishopries of the Church of England and of the Roman Catholic Church, who have missions throughout the whole territory, extending from the western boundaries of Canada

to the Rocky Mountains.
"The only form of Government which the people of this settlement possess is that provided for in the charter of the Hudson's Bay Company, dating from the reign of Charles the Second, and which is now universally admitted to be both unsuited and inadequate to the requirements of colonization. as practiced at the present day. The slow process of the Red River settlement (which was founded by Lord Selkirk in 1811) is attributed solely to the want of that form of government under which the other British North American Colonies have grown up and prospered, for several recent surveys and explora-Red River settlement and along the valley of the Saskatchewan an ample fortile territory exists for the forma- making seems to have been their principal tion of a great Colony, with almost boundless agricultural and mineral

Special Paris and Continental Correspondence.

PARIS, April 9th, 1867. VON BISMARK AND THE CESSION OF LUXEM-BURG.

There is so much confusion in the different rumo:s concerning the cession of the Grand Duchy of Luxemburg by the King of Holland to the Emperor of the French, that it is quite impossible to know whom and what we are to believe. Nothing can be more ruse than Herr von Bismark's speech in the German Parliament in answer to an enquiry of Herr von Benigsen, who wished to know with France, and our best efforts are used to avoid hurting her susceptibilities, I cannot therefore reply to the second part of the interpellation relative to the conduct Prussia will adopt in concert with her allies in that event. I find the language of the hon that event. I find the language of the hon Herr von Benigsen proper for a deputy, but I think it is hardly diplomatic. As to the first question in which you ask for information on the pretended negotiations which have taken place between France and Holclare to you that we have no knowledge of ernments are convinced that no foreign power will violate the undisputed rights of the indissoluble ties which bind the Government to the people."

The attitude of the German papers has changed within the last few days. The Kalnische Zeitung and the Kreuz Zeitung, which at first vomited fire and flame, and Globe, declare their acceptance of Con- threatened us with an invasion of Prussian soldiers, have rather moderated their tone, make the best of it. That journal and now endeavor to show that the treaties and now endeavor to show that the treaties which gave Prussia the right to garrison and command in the Grand Duchy have lost a part of their validity by the dissolution of the Confaderation. The fiascos of the make the whole thing as perfect as present head of the French Government have possible, and to supply the deficiencies succeeded each other in rapid succession, and the people of this country fear that the prestige of France is on the wane, and that something must be done to restore it. As far as the Emperor of the French is concerned personally, his very great desire is to end his days in peace like un industrious householder. Absorbed by the thought of founding a dynasty, he feels the necessity of being on as good terms as possiism. Their past opposition cannot be | ble with the great dynasties of the continent expected to be forgotten all at once; and, truly, the Hohenzollerns have become powerful in the world since the last few punished for their past opinions, it is months. However, the French are patient to unreasonable in them to expect that a certain extent; but when they see the digthey will be preferred to those who have favored the union from the first. But the issue is in the hands of the clectors; and they will decide it clectors: and they will decide it fairly. New Brunswick is not likely alarm cry raised by the press of France with to send to Ottawa a single opponent the purpose of expediting the acquisition of the territory of Luxemburg. I might inform you that this is now what the French call the question brilliante, or burning question, of morandum is being signed by a large the day. This and the protracted illness of the Prince Imperial must be the cause of great anxiety to both the Emperor and the Empress. We saw the former the day before yesterday (April 7th) at the races of the Bois de Boulogne; he looked careworn, and evidently took but little interest in what was going on around him.

THE EXHIBITION.

Of course the Great Booth at the Champ de Mars outweighs all the preoccupations of politics, grave as they be. Strangers are now arriving in shoals, and the price of lodgings is rising almost every hour. The Grand Hotel and Grand Hotel du Louvre Company, which but a few weeks ago announced that they cid not intend augments ing their prices, have now come to another determination, and inform the public that they will augment the prices 25 and 50 per cent. from the middle of April. Of course, this will also influence the smaller hotels, who desire nothing better than to follow the example. Thus, let those who intend visiting the French capital come provided with a

bagfull of money. The price of admission during the first week was five francs, and though the weather has been anything but favorable since the day of the opening, the re-

ARE WE TO HAVE A FINANCIAL CRASH ?-The Chicago Tribune, one of the best informed journals on financial matters in the West, says: The attempt of those who have embarked in all manner of speculative enterprises to realize their investments and hold the same in cash, is but a prudent measure to avert the crushing effects of the storm, should one come. There is an unhealthy condition of things proceeding from all this. The annual strife batween landlords and tenants has an extraordinary intensity in all parts of the country this season. Capital trembles as it looks into the future. Labor is demanding an increase of wages in the face of the impending panic and prostration. Never was there a time when the men of large means should so hesitate and weigh well the probabilities of the future before embarking in new enterprises, and never was there a time when those who live upon their earnings, be they great or small, should so retrench their expeaditures in every possible means to be able better to meet the impending difficulty. It may be that the country will escape a season of financial disruption and disaster, but it may not escape it. Those who are are hesitating to embark with their capital in real estate and improvements, may well consider whether they are likely to obtain any compensating return upon that investment during a season of financial disaster, and a consequent return to actual values.

FROM AUSTRALIA .- Letters have been received from Australia (says the Columbian) announcing the arrival of the ship Jeddor Capt. Fray, at Port Adelaide, in 68 days. It will be recollected that the Jeddo took out a cargo of lumber for Messra. Moody & Co., from their mills at Burrards Inlet. We regret to learn that, the consignees having failed a fortnight before the arrival of the ship, the cargo was put up to auction at an unlavorable moment, several cargoes of Baltic lumber having just arrived, and the prices realized were anything but satisfactory to the Consignors. A quantity of sa mon taken out by Capt. Gray proved to be an oqually bad, if not worse, speculation. The fish turned out to be of every inferior quality, and in bad condition. We shall have more to say on the fish question by and by.

DEATH OF A DISTINGUISHED FREEMASON The death of the Rev. George Oliver, D. D., vicar of Lcopwith, near Sleaford, is aunounced, at the patriarchal age of 84 years. The deceased was the author of several works on freemasonry, highly popular amongst the brethren, tracing the antiquity of that occult science to very remote times, establishing its relations with genuine religion, and connecting its ritual with the earlier worship of the chosen people. The deceased, who was greatly beloved and respected as a clergyman, and in all other relations of life, was instituted vicar of Scopwith in 1831 by the Bishop of Lincoln, and rector of South Hykeham, near Lincoln, in 1847, on the gift of the Lord Chancellor .- Standard, March 9th.

COMMITTED FOR TRIAL-James Smith alias Robert Livine, on remand at the police court since Saturday on a charge of obtaining goods fraudulently, was yesterday committed for trial. A second charge against the same person with obtaining five dollars from Geo. The best ivory known is that which comes from Africa; for, though it is not so white as that furnished by the Asiatic elephants, it preserves its color best, is most transparent, is freest from cracks, and receives the highest polish. This is owing to the fact that the African ivery contains about equal parts of animal and earthy matter, while in the Asiatic the proportion of earthy matter is greater. adapts it to this purpose; but, as ivery is affected by dampness and expands unequally according to the grain, it is found that the

balls do not reain their perfect sphericity in all states of the atmosphere. For this reason, and on account of its increasing scarcity, some other substance is in demand.

Vegetable ivory, so called, is used in making many articles, but it is of comparatively little value. There seems to be more hope that the requirite material will be obtained

from some compound of India rubber or gutta percha than from any other source.

Ayer's Sarsaparilla,

Acompound remedy, in which we have labored to produce the most effectual alterative that can be made. It is a concentrated extract of Para Sarsaparilla, so combined with other substances of still greater alterative power as to afford an effective antidote for the diseases Sarsaparilla is reputed to cure. It is believed that such a remedy is wanted by those who suffer from Strumous complaints, and that one which will accomplish their cure must prove of immense service to this large class of our afflicted fellowitizens. How completely this compound will do it has been proven by experiment on many of the worst cases to be found of the following complaints:

load of obloquy which rests upon it. And we think we have ground for believing it has vir-tues which are irresistible by the ordinary run of the diseases it is intended to cure. In order to

secure their complete eradication from the system, the remedy should be judiciously taken according to directions on the bottle.

Entripellas, Rose, on St. Anthony's Fire, and indeed the whole class of complaints grising from Impurity of the Blood.

This compound will be found a great promoter of health, when taken in the spring, to expel the foul humors which fester in the blood at that season of the year. By the timely exputsion of them many rankling disorders are nipped in the bud. Multitudes can, by the aid of this remedy, spare themselves from the endurance of foul cruptions and ulcerous sores, through which the system will strive to rid itself of corruptions, if not assisted to do this through the natural channels of the body by an alterative medicine. Cleanse out the vitiated blood whenever you find its impurities bursting through the skin in pimples, cruptions, or sores; cleanse it when you find it is obstructed and sluggish in the veins; cleanse it whenever it is foul, and your feelings will tell you when. Even where no particular disorder is felt, people enjoy better health, and live longer, for cleansing the blood. Keep the blood healthy, and all is well; but with this pabulum of life disordered, there can be no tasting health. Sooner or later something must go wrong, and the great machinery of life is disordered or overthrown.

Sarsaparilla has, and deserves much, the reputation of accomplishing these ends. But the world has been egregiously deceived by preparations of it, partly because the drug alone has not all the virtue that is claimed for it, but more because many preparations, pretending to be concentrated extracts of it, contain but little of the virtue of Sarsaparilla, or any thing else.

During late years the public have been misled by large bottles, pretending to give a quart of Extract of Sarsaparilla, or any thing else.
